

I wish to relate who KLOVE provides a positive service in the Denver Colorado metro area. It is positive radio station that provides a source for christian music in the community that is commerical-free/listener supported. My children listen to the station and I don't have to worry about the content of the music. Given some of the recent activities on TV and Radio, I find this a valued ersource for my family.

They also provide a local service for informing the listeners to locate chirstian activities in the Denver metro area. Losing this resource to a LPRM station would limit the communication for this information.

Having a safe listening place that is positive and also communicating local happenings for the chrstain community in the Dever area is a valued public service.

Please ensure that LPFM stations do not displace stations such as KLOVE in the Denver area.
